**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.

**NOTES:**

Outside Counsel must apply to the National Settlement Fund for their fees first. If the National Settlement Fund is insufficient, Outside Counsel will apply to the counties' backstop fund ("Utah Fund") for their fees. The Utah Fund was set up in an agreement between each county and their Outside Counsel. The Administrator, BrownGreer, will automatically pay 20% of each county's payment to the Utah Fund. Payments to Outside Counsel from the Utah Fund shall be disbursed in the same proportion as the allocation percentages. The payments to the Utah Fund will start with Payment 1 and continue until the Outside Counsel fees are paid in full. Any funds remaining in the Utah Fund will be distributed back to the counties according to the allocation percentage. According to the MOU, fees to the Outside Counsel may not exceed 15% of the settlement amount to each county. Thus, the fees for Outside Counsel will be paid in full before the payments to the counties have stopped, and the totals for the payments less backstop are 85% of their respective payment totals, while each annual payment less backstop is shown as 80% of its respective payment.

Janssen Payments stop after Payment 11.

The Allocation % is different for Payment 1 because Morgan County is not participating in that payment.

Payments may not be exact to the penny but should be a reasonable estimate.
